

Modular Range with Push Bar

Technical Drawings

Technical drawings applicable to PH350, PH355, PH357

All Panic Hardware devices (with full width crossarm) have been tested and certified to EN 1125: 2008 (classification 3-7-7-B-1-4-2-2-A-A)

Strand Antipanic Modular Push Bar Range

- The modular push bar panic exit device range comprises a full width cross bar and modular components (standard mechanism, idler and cross arm).
- The range offers a large degree of flexibility and can provide 1, 2 and 3 point latches (with horizontal or side entry Pullman latches) and 2 or 3 point bolts (with vertical Pullman latches).
- Suitable for public buildings (such as hotels, schools, retail outlets, hospitals, nightclubs) where people are unfamiliar with surroundings.
- Standard devices suitable for doors upto 2585mm high, 1050mm wide, for larger doors variations available to suit doors upto 3150mm high, 1450mm wide

Application

- Supplied with striker plates for timber doors
- Strikers also available for PVC-U, Aluminium and Steel doors (Please specify when ordering)

Dogging facility:

Dogging should not be used on the fire/smoke door assemblies

- The modular range is available with a dogging or hold-back facility
- Can only be used on escape doors
- If required specify when ordering

Microswitch

- The modular cross bar range can be provided with a micro-switch contained in either the operating mechanism or idler.
- If required please specify at the time of ordering stating the micro-switch location.

Outside access

- Optional outside access devices with lever handle or knob to provide entry from the outside (See page 14 for further information)
